WAVESPECTRUM GROUP was founded in 1999. It is comprised by a group of experienced and innovative experts in the fields of laser physics, materials science, electronic technology and mechanical design. It has established solid cooperation with some famous universities, research institutes and laboratories.

Wavespectrum products are widely used in space science, optical communication technology, laser display, laser medical, life sciences and materials processing. With the rapid development, R&D centers and production bases have been established in China and Europe. The current plant area is 4,000 square meters, including 2,000 square meters of Class 1,000 clean workshops.

Wavespectrum products include laser diodes, fiber-coupled laser modules and fiber-coupled laser systems with wavelengths from 405nm to 1920nm. Our products are used in medical, printing, laser display, life science, laser communication and other fields. At present, the products have all passed the certifications of ROHS, REACH, CE, etc. At the same time, we have got ISO90001 quality management system certification.

Wavespectrum has world-class R&D team, and it has the world first-class production processing plants. Our products can meet the military-grade production and design standards. The products are well acclaimed world-wide, such in Germany, Austria, the United States, Japan, South Korea and other parts of the world. We have established close cooperation with a number of well-known enterprises world-wide.

PRODUCT OVERVIEW

Single Mode Fiber Coupled Laser Diode is the most competitive product of WAVESPECTRUM.

We offer High Coupling Efficient Solution for 405nm~1650nm Pigtailed Laser Module with Single Mode Fiber and Polarization Maintianing Fiber, the output power can be up to 100mW. We adopt unique technique to get high Polarization Extinction Ratio (PER), which is up to 20dB with Low Noise Laser Output.

With SM and PM Fiber, it can get the Gauss Beam which is the Single Transverse Mode Beam and the M^2 value is less 1.3. Meanwhile, the TE Cooler and Photodiode is optional for customers, we can integrate them into the Laser Moudue according to customer's requirement. WAVESPECTRUM also offer the Customized Solution for Pigtailed Laser Modules, such as Customized Wavelength and Customized Power to meet the special needs of customers.

WAVESPECTRUM use laser welding technology to guarantee the long-term reliability of the laser structure. To ensure the long-term reliability, each laser diode will undergo rigorous testing and aging in factory. Meanwhile the high-low storage temperature circulation is also necessary for each laser diode. We set the storage temperature range from -40°C to $+85^{\circ}\text{C}$, and it lasts 10 cycles. In this way, it ensures the long-term reliability of the coupling structure.

PRODUCT OVERVIEW

Multi-mode Fiber Coupled Laser Module is the competitive product of WAVESPECTRUM.

We offer High Coupling Efficient Solution for 405nm~1920nm Pigtailed Laser Module with 50um,105um,200um,400um Fiber Core, the output power ranges from 5mW to 50W. Meanwhile, the TE Cooler and Photodiode is optional for customers, the Green or Red Aiming Beam is also optional for IR Lasers. We can integrate these functions into the Laser Module as per customer's requirement. The standard package of the lasers can be Coaxial,2-PIN,4-PIN,14-PIN and 9-PIN.

WAVESPECTRUM also offer the Customized Solution for Pigtailed Laser Modules, such as Customized Wavelength, Customized Power, Customized Fiber Core and Customized Package to meet the special needs of customers.

WAVESPECTRUM use laser welding technology to guarantee the long-term reliability of the laser structure. To ensure the long-term reliability, each laser diode will undergo rigorous testing and aging in the factory. Meanwhile the high-low storage temperature circulation is also necessary for each laser diode. We set the storage temperature range from -40°C to +85°C, and it lasts 10 cycles, which will ensure the long-term reliability of the coupling structure.

PRODUCT OVERVIEW

Single Mode Laser Diode is the competitive product of WAVESPECTRUM.

We offer the high quality Laser Diode with single mode beam, the wavelength range is from 405nm to 1650nm and the output power ranges from 5mW to 300mW. The photodiode is optional for customers. Now the standard package can be TO38, TO18 and TO5 Package.

WAVESPECTRUM adopt AuSn solder technology to package the laser diode. To ensure the long-term reliability, each laser diode will undergo rigorous testing and aging in factory. Meanwhile the high-low storage temperature circulation is also necessary for each laser diode. We set the storage temperature range from -40°C to +85°C, and it lasts 10 cycles, which will ensure the long-term stability of laser diode.

 High Stability

PRODUCT OVERVIEW

Collimated Laser Diode is the competitive product of WAVESPECTRUM.

We offer the high quality Collimated Laser Diode with Single mode and Multi-mode Beam. The wavelength ranges from 405nm to 1650nm and the output power is from 5mW to 5W. The Photodiode is an option for customers. Meanwhile, with the Aspheric lens, the collimated Laser Diode has a small divergence and perfect beam quality.

To ensure the long-term reliability, each Collimated laser diode will undergo rigorous testing and aging in factory. Meanwhile the high-low storage temperature circulation is also necessary for each laser diode. We set the storage temperature range from -40°C to +85°C, and it lasts 10 cycles, which will ensure the long-term Stability of Collimated Laser Diode.

PRODUCT OVERVIEW

Fiber Receptacle Laser Module is the competitive product of WAVESPECTRUM.

We offer 405nm~1650nm Fiber Receptacle Laser Module, Which is suit for 9um,50um,105um,200um,400um fiber core, the output power ranges from 5mW to 200mW. Meanwhile, the Receptacle Connector can be SC, FC or SMA905. WAVESPECTRUM also offer the Customized Solution for Fiber Receptacle Laser Modules, such as Customized Wavelength, Customized Power and Customized Fiber Core to meet the special needs of customers.

WAVESPECTRUM use laser welding technology to guarantee the long-term reliability of the laser structure. To ensure the long-term reliability, each laser diode will undergo rigorous testing and aging in the factory. Meanwhile the high-low storage temperature circulation is also necessary for each laser diode. We set the storage temperature range from -40°C to +85°C, and it lasts 10 cycles, which will ensure the long-term reliability of the coupling structure.
